SUMMARY

Recent Informatics graduate from Sanata Dharma University with hands-on experience in fullstack development, data analysis, and system design, complemented by leadership in communication and organizational roles within student organizations. Skilled in managing data, designing efficient systems, and leveraging digital tools to support business operations. Passionate about contributing to operational excellence in technology, communication, and planning through analytical thinking, attention to detail, and collaborative teamwork.

PROJECT EXPERIENCE

Fullstack Developer - YogTrip - Yogyakarta Travel Package Recommendation System (August 2024 – July 2025)

Final Thesis Project – Sleman, Special Region of Yogyakarta

- Designed and developed a Yogyakarta tour package recommendation system using Knowledge Graph and Path Ranking Algorithm (PRA), ensuring accurate and personalized recommendations through analytical data processing.
- Managed relational (MySQL) and graph (Neo4j) databases, organizing and analyzing large datasets to support system functionality.
- Monitored the web application lifecycle, ensuring efficient data handling and system performance, with evaluation metrics showing Precision@k of 0.72, Recall@k of 0.84, NDCG@k of 0.75–0.82, and Hit Rate@k of 0.97.
- Developed a responsive and interactive front-end interface, enhancing user experience based on personalized recommendation displays.

Web Development - LOCALINE - Web System Development (Union in Technology) (September 2024 – October 2024)

IT Days 2024 – Sleman, Special Region of Yogyakarta

- Developed a web-based platform to connect local UMKM with global markets, focusing on user-friendly interface design using React to enhance accessibility and engagement.
- Collaborated with a team to deliver digital solutions that supported business expansion, demonstrating strong teamwork and organizational skills.
- Contributed to securing third place in the IT Days 2024 competition by delivering an efficient and impactful system.

Fullstack Developer - Mavis Betta Fish - Web-based E-commerce System Development (August 2023 – December 2024)

Information Technology Project – Sleman, Special Region of Yogyakarta

- Built a web-based e-commerce system for Betta ornamental fish, managing end-to-end development, including front-end (React) and back-end design, database administration, and hosting on Rumah Web.
- Organized project workflows and ensured data accuracy in product listings, contributing to a user-friendly and reliable platform.
- Earned an A grade for the project due to its high-quality execution and attention to detail.

EDUCATIONAL BACKGROUND

Bachelor of Computer Science (August 2021 – July 2025)

Sanata Dharma University – Special Region of Yogyakarta, Indonesia

- GPA 3.39/4.00
- Thesis Title: “Yogyakarta Tour Package Recommendation System Based on Knowledge Graph with Path Ranking Algorithm (PRA)”

EDUCATIONAL BACKGROUND

- Technical Skills:** Python, HTML, CSS, JavaScript, Node.js, React, MySQL, PostgreSQL, Neo4j, Web3, DApps, Microsoft Office, Google Workspace, Adobe Premiere, Adobe Photoshop.
- Analytical & Data Management Skills:** Data Analysis, Database Management (Relational & Graph), System Design, Performance Metrics Evaluation (Precision, Recall, NDCG, Hit Rate).
- Soft Skills:** Analytical Thinking, Attention to Detail, Organization, Teamwork, Communication, Problem-Solving, Quick Learning.
- Languages:** Indonesian (Native), English (Intermediate).

CERTIFICATIONS

Python (Basic) -HackerRank (October 2025)

SAP01 - SAP Overview - SAP Course (June 2025)

Programming for Everybody (Getting Started with Python) - University of Michigan (July 2025)

Ultimate CSSLP Masterclass - Secure Software Development - Udemy (July 2025)

ORGANIZATIONAL EXPERIENCE

Media Communication and Information (December 2022 – December 2023)

Student Executive Board, Faculty of Science and Technology

- Responsible for preparing content for Instagram feeds, documenting various activities, and editing videos and photos for six faculty work programs.
